Vehicle Recovery Strap

Essential for recovering vehicles stuck in mud, sand, snow.

Perfect for Vehicle to Vehicle recovery or used as a sling to wrap around a tree or other stationary object for use with winch, come-along or hi-lift jack to self recover a stuck vehicle.

Recovery straps are made from extremely strong and durable nylon webbing. Custom made for TigerHitch in the USA. Straps have a limited stretch that acts like a rubber band to spring the stuck vehicle.

Specs:
2 Ply Construction

2" wide x 20 feet long
Rated at 6,400 lb working load with a 5 X factor of safety.
Breaking strength: 32,000 lbs

Recovery straps are much safer than chain or cable.
Light weight and easy to use
No dangerous heavy hooks or metal parts

\$57.35 + Shipping

WHAT'S NEW

Super Duty Lift Kit Options

BDS recently introduced four new 6-inch lift kits for '06 Ford F-250 and F-350 Super Duty 4WD pickups. The kits come with either rear blocks or rear leaf springs, and the front features radius-arm drop brackets to put the stock radius arm back at factory angle, maintaining your stock driving characteristics. The kits also are available with a new steering stabilizer, antiway bar drop brackets, a dropped pitman arm, a track-bar relocation bracket, and bumpstop extensions. There is also a new four-link system that allows 10 inches of wheel travel. Don't worry, no welding is said to be required. Info: 517/279-2375, www.bds-suspension.com

Handle-All

Hi-Lift Jack Company introduces a new addition to the Hi-Lift product line. The Handle-All is a multifunctional tool that is essential emergency recovery equipment for your 4x4. The Handle-All tool is perfect for camping, farming, ranching, and forestry use. It consists of a telescoping steel handle and four fullsize implements, providing full functionality and convenience. The key advantages of the Handle-All are that it is compact and rugged while maintaining fullsize utility. Benefits include a shovel, sledgehammer, axe, and pick axe, all of which are super-easy to change. Info: 800/233-2051, www.hi-lift.com

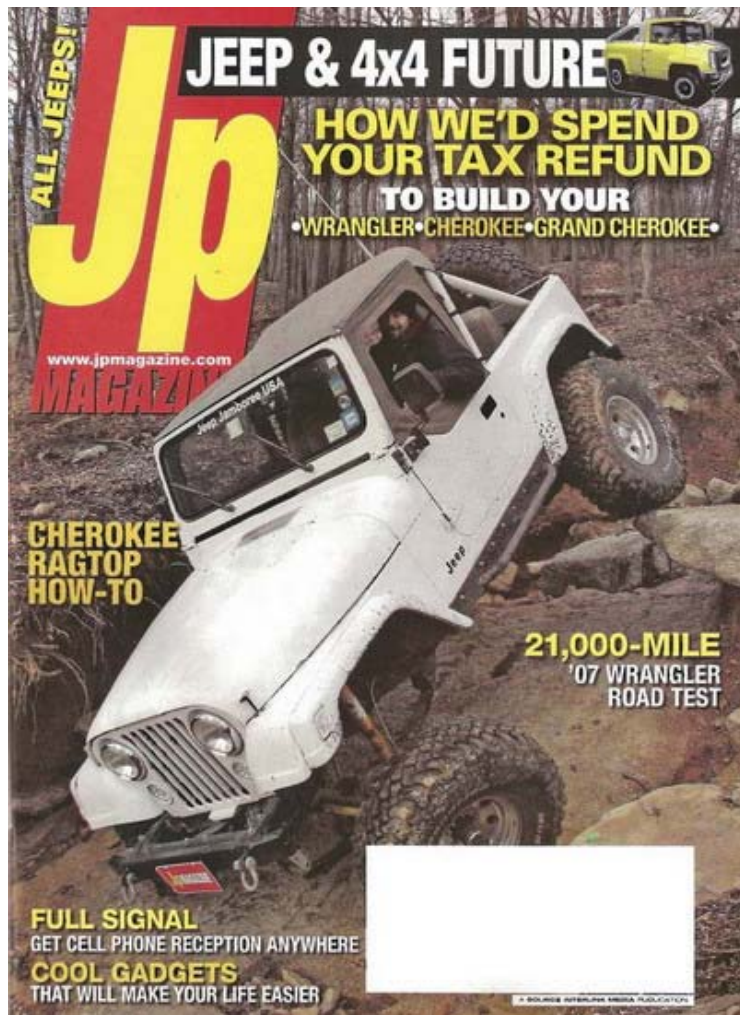

Tiger Claw

This new hitch is CNC-machined from a solid bar of alloy steel that is said to be three times stronger than any other product on the market for similar use. It comes back zinc-coated for years of rust-free service. The Tiger Claw Extreme 4x4 hitch has a 1 1/2-inch shackle and a massive tow hook rated at 10,000 pounds of working load. Info: 714/545-5707, www.tigerhitch.com

More Super Duty Lift Options

Superlift bolsters its 4-inch, 6-inch, and 8-inch lift systems for '05-'07 Ford F-250/F-350 4x4s with a new front four-link upgrade. Replacing the factory radius arms offers several advantages, primarily less caster change as the suspension cycles. This yields more stable steering and handling characteristics in all types of terrain. All components are covered by a Limited Lifetime Warranty. Info: 877/843-5351, www.superlift.com

FRESHWATER JEEP

The folks at Rompalicious 4x4 came up with the Hydra, a rollage-mounted water reservoir that allows you to haul an extra 2½ gallons of H₂O in what might already be a rather cramped vehicle. The Hydra has a halogen liner antimicrobial reservoir bladder encased in an outer casing made of a rugged ballistic material. Simply fill the reservoir and drape the top flap over the rollage and strap the bag tight. Then the gravity feed hose allows you to easily dispense water out the side of the bag without unloading it from the Jeep. **Information:** Rompalicious 4x4 Inc., 888.221.6574, www.rompalicious.com

TITAN UPPER ARMS

Though the Titan isn't the most popular fullsize truck to date, it does have some of the coolest components available for it. Take these new upper control arms from NCD for example. Titans suffer from UCA interference with the coil buckets when even the slightest lifts are put on, but now NCD has these new arms to help alleviate the problem. They're made with huge ½-inch FK rod ends and 1-inch heavy-duty builder's balls and have full camber and caster adjustment to make your lifted ride steer better than it ever could before. **Information:** NCD Customs, 866.983.4623, www.ncdcustoms.com

EXTREME HITCH

TigerClaw 4x4 has created an easier way for you to grab the back of your ride, should you ever get bogged down in some graylike mud. The new Extreme Hitch is made from solid stock, is zinc coated for its protection, and is outfitted with both a 10,000-pound working load hook and a ½-inch shackle. You'll be able to pull all your buddies out of the snowdrift now! **Information:** Tiger Hitch, 714.545.5707, www.tigerhitch.com

STAINLESS STEEL GIFT BOX

Looking for a way to wrap those \$10,000 in tools your wife just bought you (yeah, right)? Then check out Steelhead Design's new 60-inch MTech rolling cabinet. You can get this ultra toolbox in either a stainless steel finish or powdercoated. Either way, you'll get 16-gauge steel siding, ball-bearing-slider reinforced drawers, giant casters, tubular cam locks, and 27,390 cubic inches of storage. **Information:** Steelhead Design Inc., 800.261.0761, www.steelheadesign.com

SHOULD'A BOUGHT A 4X4?

Did you save some money by buying a two-wheel-drive Toyota Tacoma PreRunner only to regret not getting the 4x4 version? Inchworm is here to save the day with its PreRunner 2 to 4 adapter. Simply remove the stock tailhousing on your Toyota Automatic and bolt up a tried-and-true Toyota transfer case. Inchworm also has a new "Lefty" gearedrive case that replaces the chaindrive Tacoma case, but keeps the driver-side front output. **Information:** Inchworm Gear, 530.677.8111, www.inchwormgear.com
